

... the natural choice in today's most versatile, durable foam products for everyday living.

How do we produce foam of the highest quality and consistency without harmful emissions? At Flexible Foam, we pioneered the use of an award-winning CO₂ process in foam manufacturing, now known as EnviroFlex Technology. Quite simply, EnviroFlex is the most advanced, highly developed, environmentally friendly foaming process ever created.

Why is EnviroFlex™ superior?

EnviroFlex combines our patented, state-of-the art CO₂ process with a proprietary chemistry that provides exceptional durability, strength, and physical properties compared to conventional foam pouring processes. The result is better support, cell integrity, and longer product life. Your customers will notice the difference in feel as well as performance.

We are totally committed to EnviroFlex Technology and have introduced this unique science in all of our pouring facilities. You can rest assured of the same outstanding product quality and consistency from each Flexible Foam plant.

EnviroFlex™ Technology means:

- Greater sag or support factors
- Enhanced "hand" and tactile properties
- Excellent Tear/Tensile strength
- Supreme cell integrity for longer product life
- Incomparable durability

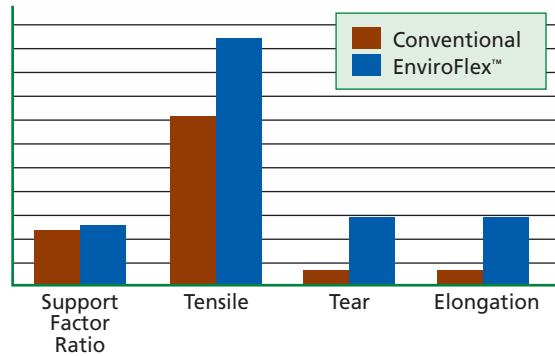

... a proprietary chemistry that provides exceptional durability, strength, and physical properties compared to conventional foam pouring processes.

The EnviroFlex process infuses our strategic, award-winning science into each foam formulation to create an advanced level of support, cell integrity, and overall endurance.

Performance & Durability Comparison

(Based on a 1.80 density foam)

Conventional vs. EnviroFlex™		
Support Factor Ratio	1.94	2.01
Tensile	10.69 psi	17.35 psi
Tear	1.22 psi	2.86 psi
Elongation	113%	260%

“People are demanding products that improve the quality of their lives, and Flexible Foam is delivering them. With our state-of-the-art technological capabilities and extensive market support system, our premium products are giving consumers new upgrade choices and allowing manufacturers to offer improved function and lifestyle. The end result is superior product quality and selection for both consumer and manufacturer ... and EnviroFlex™ makes this possible.”

Lewie Moeller, President

Flexible Thinking™ since 1950.

Founded more than 50 years ago, Flexible Foam Products, Inc., is a privately owned, customer-driven company that specializes in manufacturing superior quality foams for use in the most demanding design and industrial applications. Our Flexible Thinking™ means creating solutions tailored to meet key customer needs. It means having state-of-the-art research and development resources and quality assurance systems to ensure every product meets or exceeds customer expectations. And it means a continuing commitment to offering innovative products and enhancements while maintaining our longstanding reputation for value.
